4XEM Mobile Solar Charger (Orange)

4XEM Part- 4XSOLARPWROR

Containing a 20000mAh (milliamp hour) lithium-polymer power bank, the 4XEM Solar Charger charges all your Apple, Samsung, LG, Huawei and other mobile devices via solar energy or its USB ports. Your 20000mAh solar charger comes with 6 mobile device connectors, a charging cable and built-in LED flashlight. The 4XEM Solar Charger is compatible with most Nokia, Samsung, LG, Palm, Blackberry, Apple iPhone, iPod, iPad, Motorola, Sony, Bluetooth, GPS, various digital cameras, PSP, various eBooks, tablets, Nintendo DS, Kindle, and other devices.

Problem it solves: Use the sun's rays to charge your mobile devices when a wall outlet or USB power source are not available. Great for traveling, perfect for the outdoors!
*Solar Chargers are not as effective when placed on car dash due to UV protection found in most car windshields. Will charge power but at a greatly reduced speed.

	Power Cable Length	9.84 ft [250 mm]
	Product Height	6.50 in [165 mm]
	Product Width	3.35 in [85 mm]
	Product Length	0.83 in [21 mm]
	Weight of Product	12.70 oz [360 g]
Power	Battery Capacity	20000 mAh
	Power Delivery	N/A
	Output Power	Type-C, Type-A - 5V DC @ 3A Max Wireless - 5W Flashlight LED - 0.5W each
	Input Power	Type-C - 5V DC @ 3A Max Micro - 5V DC @ 2A Max Solar - 5V DC @ 360mAh
Environmental	Operating Temperature	0 to 40°C (32 to 104°F)
	Storage Temperature	0 to 40°C (32 to 104°F)
	Humidity	0% to 75% (non-condensing)
Packaging Information	Package Height	8.86 in [225 mm]
	Package Width	3.54 in [90 mm]
	Package Length	0.98 in [25 mm]
	Shipping (Package) Weight	14.82 oz [420 g]
What's in the Box	Included in Package	1x Power Bank 1x USB Charging Cable 1x Manual 1x Lanyard 1x Carabiner Belt-clip
Notes	Notes	4XEM Power Banks utilize rechargeable Lithium-ion batteries, and the value of rated capacities are affected by various factors including but not limited to ambient temperature, testing conditions and methods. The rated capacities of 4XEM Power Banks are all tested and approved by a third party test labs under specified conditions. (The available capacity of rechargeable batteries decreases gradually with time and the number of uses according to battery characteristics.) Output current will vary depending on the input charge properties of the device being charged."
